CodeClause / INDIA, PUNE

Implemented server-side logic in PHP, developed a functional URL shortening website with MySQL, HTML, CSS, and JavaScript. Collaborated on efficient web solutions, contributing to increased traffic and enhanced user satisfaction.Certificate

PROJECTS

Virya E-Learning Platform   HTML,CSS,JS,PHP,SQL

Developed an innovative online learning platform in response to the challenges posed by the COVID-19 crisis. This platform offers an alternative to physical classrooms, featuring user-friendly course navigation, interactive quizzes, and real-time communication tools. The outcome: widespread adoption among students and educators, facilitating seamless remote learning and bridging the educational gap created by the pandemic.

iNotebook   MERN Stack, JWT

Developed iNotebook, a dynamic web application revolutionizing note-taking. Securely log in, create, update, and delete notes for effective organization. This MERN stack project showcases technical proficiency, practical application of skills, and a commitment to user-centric solutions. iNotebook stands as a testament to continuous learning and enriched development capabilities.

Threads Unveiled   NextJS, MongoDB

Threads Unveiled is a sophisticated e-commerce platform built with Next.js, leveraging MongoDB for seamless data management. This dynamic clothing store ensures secure transactions through encryption and implements JWT (JSON Web Token) authentication for enhanced user privacy. Threads Unveiled provides a visually appealing and user-friendly interface, offering a seamless shopping experience for fashion enthusiasts. Explore the latest trends and unveil your style with confidence on Threads Unveiled.
